Abstract / Discussion (E-1, E-3, E-4): Add a mutually agreed field and associated error messages that would specify the confirming party at an interconnect on the Nomination, Quick Response and Scheduled Quantity documents. To support off-system third party title transfer services (e.g. QuickTrade) a nominator needs to provide an up/down confirmation party if the confirming party is not the up/downstream welded pipeline. Request states that "All NBPL [Northern Border Pipe Line] nominators would be required to utilize this standard for nominations if it involves a nonwelded confirmation party.
