RECOMMENDATION TO GISB EXECUTIVE COMMITTEE

Requester: TransCapacity Ltd. Partnership

Request No.: R97062

Intraday Task Force

Lander: I'll withdraw this initial motion. Here's a proposed definition that could work in place of the proposed standard:

TSP's should provide the date and time that the scheduled quantity was generated as part of the Scheduled Quantity Document.

Beaver: Second

Kardas: When you print a report, you put a date and time on it. This is the same thing. Let's vote and move on.

Beaver: This could be an instruction to IR.

Lander: Yes

Vote to send language to IR as an instruction:

Business Practices Subcommittee (November 20, 1997)

Two requests have been deemed resolved for the following reasons:

C96027 How is the Ending Date/Time relevant in the nomination - confirmation process?

was deemed resolved because it had been addressed in the November 12 Intraday Nominations Task Force meeting, (it was resolved as item S19).

and

R97062 Add a mandatory data element, "Scheduled Quantity Statement Type, to the Scheduled Quantity transaction

was deemed resolved because it had been addressed in the November 12 Intraday Nominations Task Force meeting, (the resolution can be found as instruction to the Information Requirements Subcommittee, reference p. 14 of the draft minutes of that meeting).

Information Requirements Subcommittee

See Recommendation R97017 for IR implementation.
