Subject: RE: [EXT] Initial Draft Distribution Services Contract

Hi Caroline,

Below please find some informal comments after reviewing the contract documents:

- Consider including language to defer to the applicable utility and ISO/RTO requirements as the 'source of truth' on subjects like metering and telemetry establishment.
- Include that other jurisdictions, such as RTOs/ISOs, may have requirements regarding Aggregator-DER connections and Aggregator-utility connections, and it should be noted in the document that such requirements should be followed.
- Where data is collected, for example from party A and Party B, these tables should be formatted to allow easier import into excel or utility systems.
- Acronyms, e.g., "ECS," "DS," should be written out at the first instance of use
- I recommend removing "facsimile" in the document as one of the default means of communication

Please feel free to reach out with any questions or concerns.

Thanks,
Ethan
